

NEC USB-C Desktop Displays

Adapting to new working practices

Supporting open office standards in hot desking and "bring your own device", plus business-critical home working, NEC's USB-C enabled desktop monitors are fully future-proofed with a high level of connectivity and flexibility.

Break free of cable clutter - Powerful 65W USB-C connectivity means just a single cable connects your monitor to a laptop or tablet, as well as charging your devices for an all-in-one communications hub.

Discover our broad range of desktop displays for cost-conscious to mission critical applications.
